NCL ABS DOORS

NCL ABS door is a thermo-formed, ready to use moulded door installed after completion of all the civil work.

It reduces labour oriented carpentry work. No painting or polish is required for ever.

Suitable for all residential buildings, Hotels, Offices, Restaurants, Hospitals & Institutions etc.

ABS is a thermoplastic consisting of Acrylonitrile Butadiene and Styrene. ABS plastic gets its strength & rigidity from Acrylonitrile Butadiene and Styrene. Butadiene adds impact resistance.

The properties of ABS - Water Proof, Impact resistance and toughness makes it ideal for doors.

ABS is recyclable, light in weight and dimensionally stable - Does not bend or twist.

Smart &
timeless elegance

NCL 105

NCL ABS DOORS

- Moulded & Ready to use doors
- Strong & Impact resistant
- Maintenance free
- Water Proof
- Flame retardant
- Termite resistant

Smart &
natural design

NCL 112

The decorative film used is of virgin PVC with high quality ingredients gives a long lasting finish and in harmony with nature. The deco film is fused along with ABS sheet during manufacturing process itself which bonds thermally and makes it a permanent fixing.

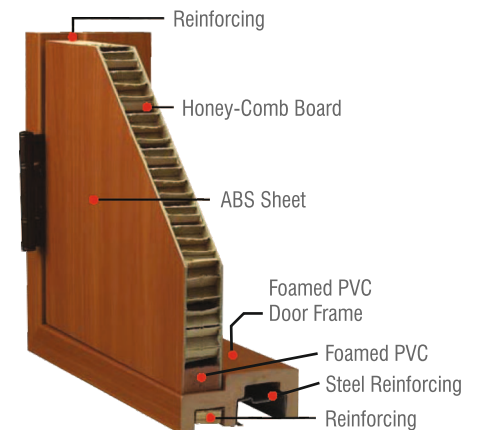

* Colours are indicative only.
Please refer to samples before making colour/ Texture choice.
