

Dated 13th December 2021

To Whom So Ever It May Concern

Dear Sir,

This is to certify that PE-AL-PE Multi Layer Composite Pipes can be used for RO Water Supplies.

The Pipes have smooth Inner Surface and are fit for use to supply water where water quality should be top priority.

Advantages

Due to smooth inner surface, micro biological growths are minimal.

Light Weight and easy to handle. Available in rolls, so may be laid over falls ceiling and panels with less potential of Installation errors and damage over a long period.

Free from Lead and other heavy metals exposure.

Please let us know if you require any further information.

Regards,

For Jindal PE-X Tubes Pvt. Ltd.
